Dear Josh:

I am writing to you in order to ask your help in allowing Montefiore Medical Center to hold their meeting on Dementia, program enclosed, at Caspary in October of 1984. This is part of a Centennial celebration of which I am co-chairman. There have been several conversations with Sandy Walsh, and Dr. Harry Zimmerman, Professor Emeritus of Neuropathology, the organizer of these seminars, has been in touch with Dr. Fillit. The latter is most enthusiastic about the program but his sponsorship will not allow us to have the auditorium as he is not a full professor.

I do not want to impose on you, but would surely appreciate anything you might do to enable us to hold these meetings at Rockefeller University. It would set a certain tone that no other place in the city could duplicate.

With warm personal regards --

Sincerely,

Phoebe
